

ATHARV GEHLOD

Vadodara, Gujarat, India | Phone: +91 93020 53410 | Email: atharvgehlod47@gmail.com | GitHub: github.com/atharv-5 | LinkedIn: linkedin.com/in/atharv-gehlodk05a24

OBJECTIVE

Computer Science undergraduate (expected graduation 2027) seeking the AI/ML Intern role on Swiggy's Food Strategy team. Experience building Generative AI (GenAI) and Large Language Model (LLM) based solutions using prompt engineering and multiple LLM APIs (Groq, OpenRouter), with a strong foundation in Python, SQL, and Database Management Systems (DBMS), and practical experience building backend APIs and React front-end interfaces.

SKILLS

Prompt Engineering and LLM APIs: Prompt Engineering (AWS Certified), LLM APIs, Groq, OpenRouter, LLaMA 3.3 70B, Claude, GenAI, AI Pipeline Design, Multi-Provider Failover

Programming Languages: Python, SQL, Java, JavaScript, HTML5, CSS3

Machine Learning and Data: Machine Learning (ML), scikit-learn, Random Forest, pandas, Exploratory Data Analysis (EDA), Data Cleaning, Model Benchmarking, Structured and Unstructured Data, Power BI, Excel

Backend and APIs: REST APIs, RESTful API Design, Node.js, Express.js, JWT Authentication, bcrypt, API Development (comfortable with FastAPI and Flask)

Frontend and Integration: React.js, Vite, Frontend-Backend Integration

Databases: PostgreSQL, MongoDB, NoSQL Data Modeling, Relational Database Design, SQLAlchemy

Cloud and Tools: AWS Cloud Fundamentals, Docker, Git, GitHub, Postman, VS Code, Google Workspace

Problem Solving: Data Structures and Algorithms (DSA), 100+ problems solved on LeetCode

PROJECTS

Athrion AI - Interview Preparation and Resume Analysis Platform (Deployed)

Team Project - Backend, Database, and AI Pipeline Owner. Technologies: React 18, Vite, Node.js, Express, MongoDB, Groq (LLaMA 3.3 70B), OpenRouter, JWT

- Owned the AI pipeline: engineered prompt-driven mock interview and resume analysis features using the Groq LLaMA 3.3 70B LLM API, with automatic failover to OpenRouter and then local simulation for reliability during API or rate-limit failures
- Built the resume parsing pipeline (Multer and pdf-parse) that extracts candidate skills from unstructured resume text and recommends target roles, working across both structured (MongoDB) and unstructured (resume text) data
- Designed MongoDB and Mongoose schemas and RESTful APIs across authentication, resume, interview, and dashboard modules; implemented JWT and bcrypt authentication with protected middleware
- Co-built and deployed the full-stack platform end to end, including the performance analytics dashboard

Customer Churn Analysis and Retention Strategy (Completed)

Technologies: Python (pandas, scikit-learn), Random Forest, SQL

- Built an Exploratory Data Analysis (EDA) and Random Forest classification pipeline on 7,043 telecom customers to evaluate and benchmark model performance, finding a 26.54 percent overall churn rate with Contract Type as the top driver (42.7 percent churn for month-to-month vs 2.8 percent for two-year contracts)
- Found that 53 percent of churned customers left within their first 12 months; translated findings into 3 retention strategies covering contract incentives, onboarding campaigns, and tech-support bundling

Sales and Business Performance Dashboard (Completed)

Technologies: Python (pandas, SQLAlchemy), PostgreSQL, Power BI

- Built an end-to-end ETL pipeline to clean and load retail order data into PostgreSQL, then queried it to power an interactive Power BI dashboard
- Analyzed 2.29 million USD in revenue across 4,922 orders and 793 customers; identified the West region as the top performer at 31.4 percent of sales, and Technology as the top category at 836,000 USD

CERTIFICATIONS

- Prompt Engineering with Claude - AWS (prompt design and optimization techniques for Claude LLMs)
- Building Language Models and Cloud Fundamentals - AWS (cloud fundamentals and LLM deployment basics)
- Data Analytics Essentials - Cisco Networking Academy (data collection, cleaning, and visualization)
- SQL and Relational Databases - IBM SkillsBuild (relational design and SQL querying)
- NoSQL and DBaaS - IBM SkillsBuild (NoSQL data models and Database-as-a-Service)

EDUCATION

Parul University - Bachelor of Technology, Computer Science Engineering

Vadodara, Gujarat, India | Expected Graduation: 2027

- Relevant Coursework: Data Structures and Algorithms, Web Technologies, Database Management Systems (DBMS), Cloud Computing, Software Engineering, Object-Oriented Programming

Florence International School

Higher Secondary Education

- Subjects Studied: Mathematics, Physics, Chemistry, English
